- 5 .AV line
6. USB line
7. Instructions & Warranty (Chinese & English edition)
8. Portable well-designed aluminum dust-proof box
9. CADI 2006 Iridology Software in English

### **Iriscope System Functions (PAL AND NTSC for your selection)**

1. The 3D mode option comes with the new DM9888AU. This mode is good for enhanced detection of pupil deformations, flaws and transversals.
2. The Focus dial is located on side of magnification adaptor instead of on top. The new location is much easier to access when focusing on iris images.
3. Light option to turn-on and turn-off right or left LED. This is good for blue eyes only, especially when observing heart sectors. Brown irises always require both lights left on.
4. Ability to adjust the focus of 30X magnification adaptor to 1-3X, and save the photos according to the time you take them.
5. Add professional skin lens, can see the epidermis, corium, aging lines, even the dynamic condition of the pores.
6. View images in 3D!

### **CADI2006 Software functions:**

Software can save and correct the client information and details of products, after take photos, you can analysis the iris picture and compare the picture. You can print an analysis report.

### **Special Price: \$ 1,000.00**
