**Miami, FL & Moultrie, GA ~ U.S.A. ~ Independent Distributor # 2040593-5**

## **CADI Alternative-light 3D Iriscope DM9988U**

### **Standard Components:**

1. Main body: Commutator with on/off switch.
2. Handle. Switch for left & right eye light
3. Iris lens 30X
4. USB Line
5. Instructions & Warranty (Chinese & English Edition)
6. Portable well-designed aluminum box
7. CADI 2006 1.29v Iridology Software (English Version)

### **Iriscope System Functions: (PAL AND NTSC for your selection)**

1. Connects directly with computer without outside power and easy to operate.
2. The Focus dial is located on the side of the handle instead of on top. The new location is much easier to access when focusing on iris images.
3. Light option to turn-on and turn-off right or left LED. This is good for blue eyes only, especially when observing heart sectors. Brown irises always require both lights left on.
4. Ability to adjust the focus of 30X magnification adaptor to 1-3X, and save the photos according to the time you take them.
5. Add professional hair or skin lenses, and you can see the epidermis, corium, aging lines, hair conditions, split ends, even the dynamic condition of the pores.

### **CADI 2006 Software functions:**

Software can save the client information and irises pictures, also details of products that you recommend them. After taken the photos, you can analysis the irises and later compare the irises pictures when your client comes back to see their progress. You can print the analysis report.

**Special Price: US\$ 1,000.00 – Includes US Shipping**
